

Oncology Lectures

Program September 2025 – June 2026

September 24, 2025, 14:00

HENRIK HEILAND

Uniklinikum Erlangen

Disconnect or resect? Novel strategies for
molecular-guided neurosurgery

November 26, 2025

ALWIN KRÄMER

University of Heidelberg

Translating molecular diagnostics into improved management
of cancer of unknown primary

February 25, 2026

RAYMOND SCHIFFELERS

UMC Utrecht

In vivo CAR T cell engineering with targeted nanoparticles

March 25, 2026

JACCO VAN RHEENEN

NKI Amsterdam

The fate of cells carrying mutations in cancer driver genes

April 22, 2026

MADELON MAURICE

UMC UTRECHT

Cellular plasticity in colorectal cancer:
identity crisis or a matter of self-organization?

May 20, 2026

JUDITH BOVEE

LUMC, Leiden

Sarcoma modeling towards patient specific treatment

June 17, 2026

JUSTIN EYQUEM

UCSF, San Francisco

Synthetic immunology to advance adoptive T cell therapy

To be announced: 29 October 2025 and 21 January 2026
